

Anaxsys Technology is pleased to report that it has completed the first closing of its current funding round raising £1.25m, which includes angel investment from two OION investors. This is £0.15m in excess of the minimum amount required to close the round.

Anaxsys Technology is a cutting edge sensor technology company that is developing a range of respiratory diagnostic and monitoring products based upon our unique sensor technology. The technology will provide inexpensive easy to use products that offer considerable advantage to the patient and healthcare professionals.

This technology continues to be developed both in-house and via academic collaborations.
